MATERIALS SCIENCE & ENGINEERING A

Subject Index of Volume 200

Aluminum alloy
thermal fatigue behavior of squeeze cast, discontinuous alumina-silicate fiber-reinforced aluminum alloy (A356) composite 181
Al–SiC composites
the effect of fatigue microcracks on rapid catastrophic failure in Al–SiC composites 192

Catastrophic failure
the effect of fatigue microcracks on rapid catastrophic failure in Al–SiC composites 192
Control mode
effects of control mode and *R*-ratio on the fatigue behaviour of a metal matrix composite 47
Cracking
on the development of fatigue failure maps for titanium matrix composites 103

Damage
thermal fatigue behavior of squeeze cast, discontinuous alumina-silicate fiber-reinforced aluminum alloy (A356) composite 181

Elevated temperatures
an approach to fatigue life modeling in titanium-matrix composites 29

Failure
failure mechanisms during isothermal fatigue of SiC/Ti–24Al–11Nb composites 55
fractographic interpretation of failure mechanisms in titanium matrix composites 78
Fatigue
a conceptual framework for interpretation of MMC fatigue 21
an approach to fatigue life modeling in titanium-matrix composites 29
an investigation of the effects of microstructure on fatigue damage in a symmetric $[0/90]_{2s}$ silicon carbide (SCS6) fiber-reinforced titanium matrix composite 89
characterization and modeling of stiffness reduction in SCS-6–Ti composites under low cycle fatigue loading 173
effects of control mode and *R*-ratio on the fatigue behaviour of a metal matrix composite 47
fatigue behavior of a cross-ply titanium matrix composite under tension–tension and tension–compression cycling 1
interfaces and fatigue damage in a metastable beta titanium matrix composite 140
the effect of fatigue microcracks on rapid catastrophic failure in Al–SiC composites 192
Fatigue crack growth
fiber volume fraction effects on fatigue crack growth in SiC/Ti-15-3 composite 68
numerical analysis of fibre bridging and fatigue crack growth in metal matrix composite materials 12
Fatigue damage
fatigue damage in a unidirectional SiC/Al composite due to push–pull and zero-pull loading 38
Fatigue failure
on the development of fatigue failure maps for titanium matrix composites 103
Fatigue loading
constituent damage mechanisms in metal matrix composites under fatigue loading, and their effects on fatigue life 114
Fiber bridging
numerical analysis of fibre bridging and fatigue crack growth in metal matrix composite materials 12
Fibre volume fraction
fiber volume fraction effects on fatigue crack growth in SiC/Ti-15-3 composite 68
Fractographic study
fractographic interpretation of failure mechanisms in titanium matrix composites 78
Fractography
fatigue damage in a unidirectional SiC/Al composite due to push–pull and zero-pull loading 38
Fracture
on the development of fatigue failure maps for titanium matrix composites 103
Full reversible loading
fatigue damage in a unidirectional SiC/Al composite due to push–pull and zero-pull loading 38

Interfacial microstructure
interfaces and fatigue damage in a metastable beta titanium matrix composite 140
Isothermal fatigue
failure mechanisms during isothermal fatigue of SiC/Ti–24Al–11Nb composites 55
isothermal fatigue behavior of a titanium matrix composite under a hybrid strain-controlled loading condition 130

Metal matrix composite
effects of control mode and *R*-ratio on the fatigue behaviour of a metal matrix composite 47
Metal matrix composites
constituent damage mechanisms in metal matrix composites under fatigue loading, and their effects on fatigue life 114
numerical analysis of fibre bridging and fatigue crack growth in metal matrix composite materials 12
Microcracks
the effect of fatigue microcracks on rapid catastrophic failure in Al–SiC composites 192
Microstructural damage
characterization and modeling of stiffness reduction in SCS-6–Ti composites under low cycle fatigue loading 173
Microstructure
an investigation of the effects of microstructure on fatigue damage in a symmetric $[0/90]_{2s}$ silicon carbide (SCS6) fiber-reinforced titanium matrix composite 89

Elsevier Science S.A.

Modeling
an approach to fatigue life modeling in titanium-matrix composites 29

Numerical analysis
numerical analysis of fibre bridging and fatigue crack growth in metal matrix composite materials 12

Polymer matrix composites
a conceptual framework for interpretation of MMC fatigue 21

R-ratio
effects of control mode and *R*-ratio on the fatigue behaviour of a metal matrix composite 47

SiC/Al composite
fatigue damage in a unidirectional SiC/Al composite due to push–pull and zero-pull loading 38
SiC/Ti composite
fiber volume fraction effects on fatigue crack growth in SiC/Ti-15-3 composite 68
SiC/Ti composites
an investigation of the effects of microstructure on fatigue damage in a symmetric $[0/90]_{2s}$ silicon carbide (SCS6) fiber-reinforced titanium matrix composite 89
thermo-mechanical fatigue modeling of advanced metal matrix composites in the presence of microstructural details 156
Silicon carbide
characterization and modeling of stiffness reduction in SCS-6–Ti composites under low cycle fatigue loading 173
Stiffness reduction
characterization and modeling of stiffness reduction in SCS-6–Ti composites under low cycle fatigue loading 173
Strain
isothermal fatigue behavior of a titanium matrix composite under a hybrid strain-controlled loading condition 130
Tension–compression
fatigue behavior of a cross-ply titanium matrix composite under tension–tension and tension–compression cycling 1
Tension–tension
fatigue behavior of a cross-ply titanium matrix composite under tension–tension and tension–compression cycling 1
Thermal fatigue
thermal fatigue behavior of squeeze cast, discontinuous alumina-silicate fiber-reinforced aluminum alloy (A356) composite 181
Thermo-mechanical fatigue
thermo-mechanical fatigue modeling of advanced metal matrix composites in the presence of microstructural details 156
Titanium
characterization and modeling of stiffness reduction in SCS-6–Ti composites under low cycle fatigue loading 173
Titanium alloy
fiber volume fraction effects on fatigue crack growth in SiC/Ti-15-3 composite 68
Titanium alloys
on the development of fatigue failure maps for titanium matrix composites 103
Titanium aluminide composites
failure mechanisms during isothermal fatigue of SiC/Ti–24Al–11Nb composites 55
Titanium matrix composite
fatigue behavior of a cross-ply titanium matrix composite under tension–tension and tension–compression cycling 1
isothermal fatigue behavior of a titanium matrix composite under a hybrid strain-controlled loading condition 130
Titanium matrix composites
fractographic interpretation of failure mechanisms in titanium matrix composites 78
interfaces and fatigue damage in a metastable beta titanium matrix composite 140
